

ATLAS Monitoring

1. Click on **ATLAS Monitoring Manager**

2. Log in using an authorized user.

3. Monitoring

The screenshot displays the ATLAS Monitoring Manager interface. The top section, titled 'Clients', shows a table of active clients. The bottom section, titled 'Transactions', shows a log of recent system activities.

| Client Type | Client Description | Work Station | Client Status | Last Login | Last Logout |

| 03/16/11 10:19:51 AM | System Setup Logout | Completed Successfully | SYS. SETUP | KABA1, KABA1 -> KIMW7014 |

ATLAS monitoring manager is used to monitor real time activity in the ATLAS System.

The top portion is used to display users and peripherals that are logged in to the system. If an Item is orange, it points to a hardware issue. If Green, it is operating correctly.

The bottom portion displays the last 15 real time transactions in the system.
