

ATLAS Web Application

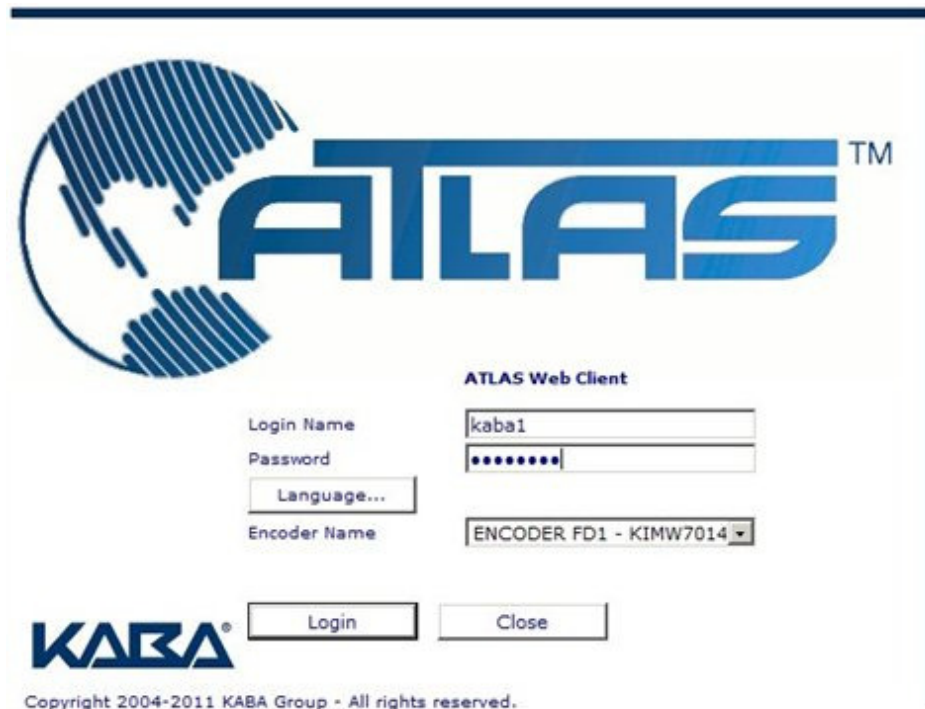

Note: To use the ATLAS web application, you must use Microsoft Internet Explorer

Creating the ATLAS shortcut on the desktop and logging in

Open Internet Explorer. In the address bar enter `http://servername/atlas`

Once the page opens up, drag and drop the information in the address bar to the desktop and this will create a shortcut

A screenshot of the ATLAS Web Client login page. The page features a large blue logo on the left consisting of a globe and the word "ATLAS" in a bold, sans-serif font. Below the logo, the text "ATLAS Web Client" is displayed. The login form includes the following fields and controls:

- Login Name:** A text input field containing "kaba1".
- Password:** A text input field with masked characters (dots).
- Language...:** A button to open a language selection menu.
- Encoder Name:** A dropdown menu currently showing "ENCODER FD1 - KIMW7014".
- Buttons:** "Login" and "Close" buttons.

The KABA logo is visible in the bottom left corner, and the footer text reads "Copyright 2004-2011 KABA Group - All rights reserved."

To log in, enter your username and password

Select the encoder that you will be making keycards from. Click on Login
