

Keyless ATM Management System

Cloud-based access and security for ATMs, with smartphone app and dashboard

The next step in securing ATMs is keyless. With the Keyless ATM Management System, financial institutions can:

- Reduce the chances of ATM downtime, therefore increasing customer satisfaction.
- Reduce the risk of ATM attacks, as no exterior door lock to attack.
- Reduce the risk of unauthorised access to ATMs

Monitor, programme and produce audits.

From the dashboard, authorised personnel are able to view real-time status of locks.

Keyless ATM Management System installed on ATM room door
