

## Keyless ATM Management System

Reduce ATM downtime with Keyless ATM access and security

With the Keyless ATM Management System, there is no need for physical keys or manual input of codes to locks.

- No need for complex key management systems when managing large estates.
- Authorised personnel can gain access with dedicated smartphone app. User credentials are checked in the central database and access is granted or denied dependent on access rights and scheduling - within seconds.
- More convenient for CIT and engineer personnel, removing need for the 'middle man', permissions and access to ATM room are gained via the app.
- Offers smooth integration between CIT and financial institutions.
- Lower carbon footprint with reduced travel between sites to provide keys or permissions for access.
- Increase safety of lone worker employees.
- Allows flexible, dynamic scheduling of CIT replenishment / service engineers.
