

Keyless ATM Management System

Reduce risk of unauthorised access

The Keyless ATM Management lowers the chances of internal vandalism and theft, with no external lock fitted to vandalise or attack.

- Due to there being no external lock, the locking system is SR4-6 security rated (certification pending) to LPS1175.
- App uses geo-location, personnel must be by the lock in order for the code to be released and the lock opened.
- Constant visibility of lock statuses via digital dashboard. Alerts if doors are left open or open outside of allotted timeframe.
- Silent duress feature
- Geo-location ensures doors are closed and locked when they are meant to be.
- Integration into CCTV

login to app,
request access to
lock
