

# Shield

## Hygienic protection glass

## A smile connects. Shield protects.

dormakaba SHIELD Hygienic protection glass partitions offer a clean look, while promoting physical distance and protecting customers and workers alike from the spread of contagions.

dormakaba's SHIELD hygienic glass partitions provide an excellent solution to create safe barriers on existing counter-tops, reception areas, desks, and fixtures and its clear aesthetics blend in with any furnishings or decor. They offer added protection by physically shielding employees from each other and from consumers.

In many applications, the SHIELD can be a temporary or a permanent fixture and offers several advantages, especially for permanent and public-facing installations. Glass is easy

## Separation for your protection

to clean and sanitize making it a more hygienic, less expensive, natural, sustainable and a more permanent alternative to plexiglass acrylic types of dividers.

Glass has an excellent service life. The smooth surface resists contamination and can easily endure high-frequency cleaning with most cleaning agents without discoloration or surface degradation. Glass is also more resistant to scratches than acrylic or plexiglass resulting in minimal long-term replacement needs.

SHIELD is available in multiple styles and designs that connect glass elements to each other, or to existing surfaces such as a countertop.

### Selection

MANET fittings are manufactured of stainless steel. For other aluminum anodized models you can choose from available finishes to best match your interior decor.

### Assembly

SHIELD partitions can be permanent or temporary and are assembled and installed quickly.

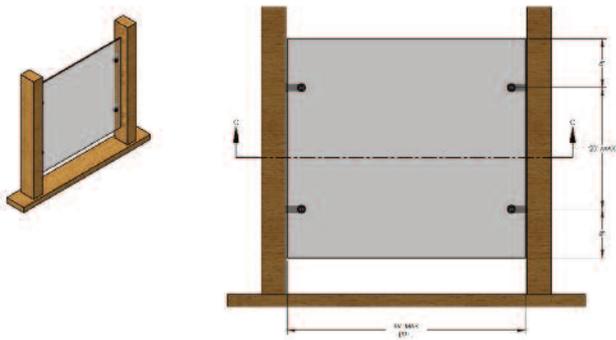

### Cleaning & Maintenance

SHIELD partitions are easy to clean and maintain. It can endure high-frequency repeated cleaning using soap and water as well as a host of cleaning and disinfecting agents – all without surface degradation or discoloration.
