### 700 Series LA GARD Locks

We are pleased to announce that effective October 3, 2022, dormakaba 700 Series Models 701-705 will be delivered with new firmware versions.

This firmware will introduce feature enhancements that are user impacting.

Please review the summary of impacts below and be advised that operating instructions, user guides have been revised.

**\*\*Free Firmware updates are available using LA GARD 700 Series Software\*\***

#### What has changed:

- Display Keypads give indication on display during power up
  - LCD screen now has “starting”
- Force code change for the manager and user codes is now an optional system setting that can be set in the software system setting or going into the system (combination – force change). The default setting doesn’t force a code change.
- All Keypads will give indication that the time-delay period is over
  - LCD screen comes on and lock beeps prompting for combination to be entered
  - The keypad will flash and beep to indicate that the confirmation window is now open.
- Extended time for programming
  - Extend the time period for the lock to be programmed by the PC or through the keypad by an additional 10 seconds.

- Give warning when changing combination length
  - Gives an audible and visual warning that the combination length is going to be changed. Existing user combinations will require change to meet the new combination length requirement.
- Adjust authority on Time Lock feature
  - Lock out all time changes during time lock unless there was a power failure and then only the Manager and Master could set time.
- All standard users will have opening and Audit privileges by default
  - When a standard user is created the default is that they have opening and audit privileges

### Software:

- Able to import/export user profiles
- Time Schedules are now aligned different for easier view and setting
