Magnetic Sliding Entrance System

Linear Magnetic Drive Technology

# DORMA MAGNEO

## Powered by advanced LMD technology

Powered by linear magnetic drive technology (LMD), the DORMA MAGNEO is an entrance system designed for any modern interior whether public, commercial, or private. Its sleek *Contur* design has minimalist clean lines that blend seamlessly to meet discriminating applications. Innovative magnetic technology ensures that

the MAGNEO is safe, reliable, whisper quiet, and resistant to wear.

Ideal for both new and retrofit interior applications, the MAGNEO's modern design and easy operation make it an attractive and efficient way to update both the function and appearance of existing interior doorways.

The versatile MAGNEO meets all safety requirements for low energy applications. Its extra sensitive operation instantly detects any obstruction. Activation is achieved via touchless design push plate, radio remote control, or traditional infrared motion detectors.

### TECHNICAL DETAILS

#### Mounting

- Surface mounted
- In wall

#### 3 Opening Widths

- Up to 34" (875 mm)
- Up to 39" (1000 mm)
- Up to 44" (1125 mm)

#### Internal Cover

- Height: 2-7/16" (62 mm)
- Height: 3" (75 mm)

#### Door Panel Types

##### Supported

- max panel weight 175 lb (80 kg)
- All-glass
- Framed glass
- Wood
- Metal

#### Accessories

- Manet fixings on all-glass doors
- Recessed door grip for all-glass doors
- Glass clamping rail

#### Floor Guide Rails

- For wood door panels
- For all-glass door panels
- For framed door panels

#### Door Activation

- Infrared activator
- Radio transmitter and radio receiver DORMA Easy Switch
- External program switch EPS-3
- Easy Push-&-Go operation
