

**KABA** In-Room Safes

210-D

213-D

214-D

**Solid, Secure & Simple to use**

In today's wired world, people carry a wide array of expensive electronic devices, and they want a safe and secure place to store them when away from home. Kaba has the solution with a complete line of in-room safes that combine impeccable construction, unparalleled security, and extremely user-friendly operation. Kaba safes are easy to use while offering secure storage for personal items. These safes are ideal for hotels, resorts, apartments, student housing and offices, amongst others.

**Designed to Match any Interior Décor**

A powder coat finish adds long-lasting durability, while the smooth, rounded corners blend with any room décor. Keypad color options can be combined with different safe color options. For example, a black keypad can be combined with a silver safe, or vice versa. The standard configuration for Kaba safes is with an ivory keypad on an ivory safe. Additional color options are also available on a custom basis.

**Features & Benefits:**

<b>Programmable Personal Code Entry</b>	Guests choose their own personal four-digit code to lock/unlock the safe
<b>Illuminated Keypad</b>	Energy-saving, brightly lights keys for easy adaptability and enhanced operation
<b>Emergency Control Unit (ECU) - Handheld Programmer</b>	An easy-to-use handheld unit can be programmed with up to 64 unique 4 digit passwords to be used as the safe opening code. The ECU can be used as an emergency unit to unlock the safe if a guest forgets their code or leaves it locked after check out.
<b>Audit Trail - Single Option Available</b>	The ECU allows to download the last 240 entries, showing who used the safe and in which room. This data may be viewed and printed via the safe audit software.
<b>Resident Master Code</b>	The resident master code has the ability to unlock the safe directly on the safe keypad and override any code set by a guest.
<b>Code Blocking</b>	Guards against unauthorized use after 3 failed access attempts
<b>Battery Override</b>	The ECU allows access to the safe if battery failure occurs
<b>One-Touch Battery Audit</b>	Instantly obtain battery conditions by touching the # key on the digital keypad
<b>Quick-Access Battery Panel</b>	Standard AA alkaline batteries are housed behind an access panel inside the door so that there is no need to remove the entire door cover for battery replacement.

## OPTIONAL FEATURES

All models are available in the following configurations:

### ELECTRONIC KEYPAD ONLY

- Provides guests with digital access for locking and unlocking the safe. A guest chooses his/her own personal four-digit code, enters it on the keypad, shuts the door, and presses the close button for secure locking.

### ELECTRONIC KEYPAD WITH MECHANICAL KEY OVERRIDE

- In case of emergency, a master key can be used to unlock the safe. All electronic safes come with an electronic override.

### MOUNTING PEDESTAL
