Elegant Argus Sensor Barriers and Sensor Gates

Easy to use
Inviting
Unique

Two product lines
The units in the Argus product range consist of a sensor-controlled passage with automatic door elements in various versions. They provide for convenient contactless passage, even with bags or luggage. There are two product lines available, depending on how the door wings open.

Slender Argus HSB
(Half-height sensor barriers)
Tried-and-tested HSB sensor barriers are equipped with door leaves and can be individually customised thanks to the wide range of materials and finishes. You can choose between a stainless steel housing or transparent side walls – matching the design of the entrance area. Moreover the sensor barriers are available in three different lengths – depending on the sensor system used and the level of security desired.

Robust Argus HSG
(Half-height sensor gates)
The HSG Sensor Gates are equipped with door leaves available in different heights. Further features include the premium sensor system and the solid stainless steel housing. During passage, the sliding panels move swiftly into the housing.
Advantages of Argus Sensor Barriers and Sensor Gates

The modular combination of personal safety, throughput rate and design enables entrances to be customised as required.

**HSB Sensor Barriers**
- comfortable passage, even with bags or luggage
- no contact with the door leaves
- high throughput rate along with high level of personal safety
- different security levels for diverse security demands
- versatile transparent designs
- modular system with basic and extension units for multi-passage installations
- door wings always open in direction of passage
- automatic sneak-by guard (note security level)
- acoustic alarm when used without authorisation
- child detection (note security level)
- special 900 mm width available – suitable for disabled users

**HSG Sensor Gates**
- comfortable passage, even with bags or luggage
- no contact with the door leaves
- high throughput rate along with high level of personal safety
- robust stainless steel body
- modular system with basic and extension units for multi-passage installations
- automatic sneak-by guard (note security level)
- acoustic alarm when used without authorisation
- child detection (note security level)

Additional versions with a larger passage width for sensor barriers or with automatic swing doors in matching design for sensor gates offer a good solution for disabled access.
The ideal solution for any entrance

Robust yet looks great in combination with glass

Sensor barriers with extension units

Sensor barriers stylishly integrated into timeless interiors

Display with green and red signals shows clearly if the way is barred or free
For convenient entry into:

- Office and administrative buildings
- Ministries and government buildings
- Banks and financial institutions
- Airports
- Industrial buildings
- Schools and universities

**HSB Sensor Barriers**

- Throughput: up to 30 per minute
- Security level: ☐☐☐☐
- Comfort: ☐☐☐☐☐
- Staff supervision: yes

**HSG Sensor Gates**

- Throughput: up to 30 per minute
- Security level: ☐☐☐☐

- Stainless steel AISI 304, satin finish.
- Two door leaves made of transparent polycarbonate, upper edge 900 mm.
- Swinging area monitored by separation sensors.
- Stainless steel satin finish.
- Type 2 *
- Integrated in the swing tube.

Security level 1.
- Passage area monitored by basic sensor system with a compact installation length (basic level of single passage monitoring in both directions).

Open or closed **
- Control system and power supply integrated in the unit.
- 100 - 240 VAC, 50/60 Hz, 368 VA.
- 17 VA.
- Door leaves move freely.

Dowelled on finished floor level, FFL.
Not suitable for outdoor installation.
Housing IP43, components conducting supply voltage IP43.

- 1240

AISI 304 stainless steel with satin finish.

Two barrier elements made of toughened safety glass, upper edge 1200 mm (max. 1800 mm, see options).

Movement area monitored by a light grid.

Stainless steel satin finish.

Type 2 *

Integrates in housing.

Security level 2.

Passage area monitored by enhanced sensor system with an optimised installation length and arrangement (increased level of single passage monitoring in both directions).

Integrated sneak-by guard, detection of children and trolley cases.

Open or closed **

Control system and power supply integrated in the unit.

100 - 240 VAC, 50/60 Hz, 299 VA.

17 VA.

Door leaves open.

Dowelled on finished floor level, FFL.

Open for outdoor installation.

Housing IP32, components conducting supply voltage IP42.

**HSG-L01**

### Function

- Emergency and escape route modules with emergency push button, additional emergency push button available.
- • • • • • • • • • • •

### Electrical equipment

- Installation preparation on flat surface for on-site components or using mounting plate for surface installation.
- • • • • • • • • • • •
- Plastic cover plates instead of stainless steel plate for installation of antennas provided by customer.
- • • • • • • • • • • •
- Push button for manual single release.
- • • • • • • • • • • •
- Operating panel and frame or surface mount housing.
- • • • • • • • • • • •
- Additional circuit boards for expanding existing inputs and outputs.
- • • • • • • • • • • •
- Various signal devices.
- • • • • • • • • • • •

### Installation

- Pallet with stainless steel ramp and norament rubber covering, height approx. 80 mm.
- • • • • • • • • • • •
- Pallet with stainless steel ramp and norament rubber covering, height approx. 32 mm.
- • • • • • • • • • • •
- On adjustable mounting plate X = 80 - 180 mm for sub floor level.
- • • • • • • • • • • •
- With cast-in clamping elements and cover rosettes for sub floor level.
- • • • • • • • • • • •

---

**OPL 05 operating panel.**

**Signal device LED arrow-cross**

(Installed in the housing or in the cover plate of both sides)

**Console 1 with plastic adapter in RAL 9006, W/H/D 94/94/65 mm with Ø 65 mm cut-out, fixed to lateral barrier.**

**Installation HSB-E07, -E08, -E11 dowelled on finished floor level FFL.**

**Cast-in with clamping elements on sub floor level SFL with mounting plates.**

**Installation HSB-E02, -E04, -E10, -E12 dowelled on finished floor level FFL.**

**On sub floor level SFL with mounting plates.**
