Restrictive Movement Cylinder*

The innovative design of the restrictive movement cylinder, ensures the door is guarded against being locked from within the room. The cylinder also guarantees that authorised key operation from the external side is maintained even if the internal thumbturn is being held by the occupant in an attempt to prevent access.

- Innovative solution
- Integral clutch mechanism for authorised key override
- Non-handed can be set on site for clockwise or anti-clockwise turning
- Easy to retrofit
- Available in all sizes from 31/31

Specifications:
- Cylinders: high security cylinder ranges in euro profile.
- Minimum length: 6 pin cylinder key side 31.5mm. Thumbturn 31.5mm
- Restrictive movement of thumbturn complete with clutch function for authorised key override at any time
- Thumbturn is fixed within the cylinder to have a restrictive movement allowing movement in a clockwise or anti-clockwise direction.
- The clutch mechanism within the cylinder ensures the authorised key will always operate the cylinder, even if the thumbturn is held in an attempt to prevent access

Including:
- Extensive master keying capability
- Patent key protection
- Key copying protection (depending on system)
- Anti-pick protection
- Anti-drill protection

Areas of Application:
- Education Establishments
- Healthcare
- Mental Health
- Custodial
- Probation Facilities
- Welfare & Benefit Offices

Notes:
- Can be supplied independently or integrated as part of a larger master key system.
- Cylinder should be checked for functionality with lockcase before specifying.
