

# B-COMM for Oracle Time and Labor Automate Data Collection with Kaba's B-COMM

*An Enterprise-class Solution*

## *B-COMM for Oracle EBS Time and Labor*

B-COMM for Oracle Time & Labor is a scalable, enterprise-class application that facilitates data flow from a variety of data collection devices into Oracle EBS Time & Labor. The software is tested and approved through Oracle's rigorous Validated Integration process, giving users the confidence that the integration is functionally and technically sound.

Because organizations today are faced with doing more with less while at the same time dealing with increasing government regulations, a solution for accurately and efficiently collecting time is essential. Kaba's B-COMM communicates securely and seamlessly using standard APIs into Oracle EBS Time and Labor.

Kaba's innovative data collection solution results in substantial time savings by increasing efficiency in the data collection and reporting process. Additional benefits are realized by reducing the potential exposure associated with inaccurately collected employee time. The B-COMM solution is a practical tool for organizations requiring a cost effective way to manage time and data collection.
