1 Technical specifications

1.1 Overview

These instructions are for installation of MUTO PREMIUM and COMFORT sliding door system XL150/80 / L80 with Sidelites for the following mounting and style versions:

1. Ceiling mount

1.1.1 General information
- dormakaba requires use of tempered monolithic or tempered laminated glass.
- dormakaba glass hardware is not suitable for application in rooms where chemicals (e.g. chlorine) are used as indoor swimming pools, saunas or salt-water pools.
- Never move sliding panels faster than walking speed and always stop the door manually before it reaches end position.
- Do not slide doors with excessive force. Install limiting stop to prevent door from opening too far.

1.1.2 Intended use
- For sliding door in dry indoor areas only
- For manual slowly opening and closing only

1.1.3 Glass requirements and fittings
- The substructure/wall must be able to bear permanent loads and be level (max. tolerance: 1/16" [2] per 39" [1m]).
- Fasteners must be sufficiently dimensioned for the substructure/wall and weight of the door.
- When adjusting glass components, always stick to the required clearance for the respective hardware. Adjust clearance so glass does not come in contact with any hard surfaces such as glass, metal or concrete.
- Do not use excessive force when installing the glass (avoid over tightening screws).

1.1.4 Requirements for glass panel
- dormakaba requires use of fully tempered glass, which complies with ASTM C 1036 and ASTM C 1048. Secondary heat soaking processes are recommended but not required. This applies to both tempered monolithic and tempered laminated glass.
- Clamping area must be flat and uncoated (no self-cleaning coating!)
- Never use glass with conchoidal fractures and/or damaged edges.

1.1.5 Safety instructions
- Installation requires two people.
- Only properly qualified and specially trained staff are authorized to mount dormakaba glass hardware.
- Due to crushing hazards and possible injury caused by breakage of glass during mounting, corresponding protective clothing (especially gloves and protective goggles) is required.
- Never clamp metal fitting hardware directly to glass surface.

1.1.6 Symbols used - Safety/Installation

CAUTION
Mounting components must meet the requirements of substructure/wall and door weight. Please read the technical information for fittings.

WARNING
Risk of breaking glass. When installing the door, support the door panel with a block of wood or similar object.

TIPS AND RECOMMENDATIONS
Information note

CLOSING EDGE

1.1.7 Maintenance, care, repair
- Immediately replace damaged parts.
- Always use original dormakaba parts.
- Clean clamping area with alcohol-based standard commercial cleaning agent before mounting the glass hardware.
- Use a damp cloth for occasional cleaning, especially the track.
- Always use silicone - and oil-free cleaners (e.g. acetone).
- Check glass hardware at regular intervals for proper positioning and smooth operation and correct adjustment.
- High traffic door systems require inspection by properly qualified staff (specialized companies or installation firms.)

1.1.8 Disposal
Disposal in accordance with local, state and national regulations.
### 1.2 Specifications - technical data

</tr>
</tbody>
</table>

**NOTE:** Door glass should not be installed until the full cure time as been reached (see chart above).

**Important safety-related information for the mounting and use of dormakaba glass hardware.**

1.1 Clean clamping area with alcohol-based standard commercial cleaning agent before mounting the glass hardware.

1.2 Never clamp metal glass fitting hardware directly to glass surface.

1.3 Never use clamping product on surfaces with self-cleaning coatings.

NOTE:
**Overhead Reinforcement:**
The overhead reinforcement must be a minimum of ¼” [6] x 3” [76] steel angle, 16 gauge metal stud, or two pieces of 1 1/2” [38] thick wood blocking (double stacked), secured to studs or joists on a maximum 16” [406] centers for the length of the track. The overhead reinforcement may be flush on the overhead surface or on the interior of this surface.

Track mounting screws must fully penetrate the steel angle, metal stud, or at a minimum of 2” [51] into wood blocking, utilizing the predrilled holes in the MUTO track.

Consult with a structural engineer to determine if reinforcement is adequate for your specific application or to meet specific codes in your location.

### 2.3 Installing the end stops

2.3.1 Slide bumper stops into each end of the track.  
**NOTE:** Loosen bottom section of end stop for easier install.  
**NOTE:** FOR XL150 end stops, be sure set screw is flush with back of bumper.  
**NOTE:** Exact location/adjustments will be determined in the Adjustment End Stop Location step.

### 2.4 Securing gasket to track

2.4.1 Ensure the track is cut to proper length.  
**NOTE:** SEE DIMENSION INSTRUCTIONS ON PAGE 6.

2.4.2 Cut adhesive gasket equal to sidelite glass width.

2.4.3 Adhere gasket along bottom edge of back of track.
2.5  Securing track and sidelite section profile to mounting surface

Fig 3

2.5.1  Secure track to mounting surface.
2.5.2  Align predrilled holes in sidelite profile with track profile.

NOTE: Holes will be predrilled every 7-7/8" [200].

2.5.3  Secure with proper fasteners.

NOTE: Be sure fasteners are flush with track to avoid rollers catching protruding fasteners.

2.6  Installing U-channel for sidelite

Fig 4

2.6.1  Install gaskets as shown. Trim to correct length.
2.6.2  Secure u-channel to floor using appropriate fasteners.

NOTE: Ensure u-channel is plumb and the back of the u-channel profile aligns with back of sidelite profile.
2.7 Installing sidelite glass

Fig 5

2.7.1 Place setting blocks into u-channel.
2.7.2 Spray inside of u-channel with glass cleaner.
2.7.3 Lift glass up and into sidelite profile.
2.7.4 Lower glass into u-channel.
2.7.5 Ensure there is 1/8" [3] gap between wall and edge of sidelite glass.
2.7.6 If using tempered laminated glass, gently press glass panel against u-channel gasket and dispense silicone along full length of non-gasket side of U-channel.

2.8 Installing sidelite glass filler panel

Fig 6

2.8.1 Fit filler panel in to gap of door panel section in sidelite profile.
2.9 Installing sidelite glass gasket

Fig 7

2.9.1 Cut gasket to length per chart above.

2.9.2 Press gasket in between sidelite glass and sidelite profile.
2.10A Installing the roller carriers: on monolithic glass ONLY

Fig 8

Legend

- Closing edge of door
- Hex key size
  - XL150/80: 4mm
  - L80: 2.5mm
- Torque values
  - XL150/80: 4 ft lbs [5Nm]
  - L80: 5Nm

**NOTE:** THE RECOMMENDED ADHESIVE’S SET-UP TIME IS 20 MINUTES FOR THE DUO-PAK CARTRIDGES.

**NOTE:** USE 1:1 RATIO PLUNGER WITH THE 3M™ Scotch-Weld™ Urethane Adhesive.

**NOTE:** FULLY CLEAN SURFACE OF GLASS WITH AN ALCOHOL-BASED MILD GLASS AND SURFACE CLEANER. ENSURE NO DEBRIS IS ON THE GASKET.

**NOTE:** ENSURE ROLLER CARRIER WHEELS ARE FREE OF DEBRIS.

2.10B.1 Slide carriers onto glass.
2.10B.2 Replace existing gasket with TLG gasket.
2.10B.3 Slide laminated glass gasket and metal shim between glass and roller carrier.

**NOTE:** Orient gasket with rubber side facing the glass.

2.10B.4 Replace existing set screws with vented set screws.
2.10B.5 Tighten vented set screws at 4 ft lbs [5Nm].

**NOTE:** Onto scrap material, first dispense approximately 12” of 3M™ Scotch-Weld™ Urethane Adhesive prior to application to prevent mixing errors and ensure optimal hardening.

2.10B.6 Dispense adhesive into vented set screws on both sides of carrier.

**⚠️** Stop application when adhesive can be seen past edge of roller carrier.

**⚠️** DO NOT WIPE any excess adhesive from glass surface. Allow adhesive to dry and scrape off glass surface with a beveled-edge chisel or putty knife.

**NOTE:** Keep glass flat during curing process.

**NOTE:** See chart in Specifications section for appropriate curing time.
2.11 XL150/80 (ONLY): Install DORMOTION unit

**Fig 10**

**XL150/80 (ONLY):**

2.11.1 Slide DORMOTION dampener onto glass.  
- **NOTE:** Oriented with triggers facing outward.

2.11.2 Dampener must be flush against leading roller carrier.

2.11.3 Secure dampener to glass using appropriate-size hex key.

2.11.4 Engage triggers: push out towards end of DORMOTION unit.

2.12 L80 (ONLY): Install DORMOTION start/stop

**Fig 11**

**XL150/80 (ONLY):** Install DORMOTION unit

**XL150/80 START/STOP TO BE INSTALLED IN A LATER STEP.**

2.12.1 Slide L80 start/stop onto glass.

2.12.2 Center between the carriers.

2.12.3 Slide glass gasket between start/stop and glass.

**NOTE:** Orient with gasket facing glass.

2.12.4 Secure start/stop via set screws.
2.13 Disengaging the anti-jump

2.13.1 Disengage the anti-jump on roller carrier.

NOTE: Using the appropriate-size hex key, push anti-jump adjustment screw IN and turn COUNTER-CLOCKWISE 90° to disengage anti-jump.

![Anti-jump adjustment](image)

NOTE: Anti-jump shipped engaged.

2.14 Install glass/rollers in track

2.14.1 Place glass on setting blocks on floor for stability.

2.14.2 Tip glass and rollers upward and rest rollers on track.

*If installing/hanging tempered laminated glass panels, ensure carrier adhesive has cured for 48 hours. See Specifications for more information on cure time.*

ENSURE ROLLERS AND TRACK ARE FREE OF DEBRIS.
**2.15 Install floor guide**

**Fig 14**

- **ANTI-JUMP IS DISENGAGED!**
  2.15.1 Align centerline of glass with centerline of floor guide.
  2.15.2 Be sure the glass is plumb.
  2.15.3 Mark appropriate floor guide measurements.
  2.15.4 TEMPORARILY REMOVE GLASS AND ROLLERS FROM TRACK.
  2.15.5 Pre-drill into mounting surface using a 5/16” drill bit.
  2.15.6 Secure floor guide anchor with included fasteners.

---

**2.16 Install floor guide: continued**

**Fig 15**

- **SET GLASS AND ROLLERS ONTO TRACK.**
  2.16.1 Slide floor guide over floor guide anchor and tighten with set screws.
  2.16.3 Remove setting blocks.
  **NOTE: Be sure glass is centered in floor guide.**
  2.16.4 Adjust using set screws.
2.17  Engaging anti-jump

Fig 16

2.17.1 Engage anti-jump on roller carrier.

2.17.2 Using appropriate-size hex key, push anti-jump adjustment screw IN and turn **CLOCKWISE** 90° to engage anti-jump.

2.20 L80 (ONLY): Install DORMOTION unit

Fig 19

2.20.1 Loosen hex screws on plates.
- Plates should start out parallel to track.

2.20.2 Place one L80 DORMOTION unit into each end of the track channel.

2.20.3 Slide door all the way OPEN.

2.20.4 Carrier should touch end stop.

2.20.5 Slide Dormotion unit over until it aligns with start/stop pin.

2.20.6 Rotate plates inside track to engage.

2.20.7 Tighten hex screws with 3 ft lbs [3Nm] of torque.
2.21 L80 (ONLY): Adjust start/stop pin location for L80 DM unit

Fig 20

2.21.1 Adjust HEIGHT of start/stop pin, if necessary:
- Loosen hex screws.
- Slide pin and plate up or door.

2.21.1 Adjust start/stop pin LENGTH, if necessary:
- Remove hex screws.
- Remove pin and plate.
- Rotate hex nut to length or shorten pin.
- Reassemble pin parts.

CORRECT

INCORRECT
2.22 XL150/80 (ONLY): Install DORMOTION start/stops

Fig 22

2.22.1 Loosen hex screws on plates.
- Plates should start out parallel to track.

2.22.2 Place start/stops into track channel.

2.22.3 Slide door all the way OPEN.

2.22.4 Carrier should touch end stop.

2.22.5 Slide start/stop into Dormotion unit trigger.

2.22.6 Rotate plates inside track to engage.

2.22.7 Hand tighten hex screws.

2.22.8 Adjust using center set screw, then fully tighten hex screws.

2.22.9 Plate parallel to track.

2.22.10 Plate rotated.

Legend

- Closing edge of door

Hex key size

XL150/80 4mm
2.23   Cover clips

Fig 23

2.23.1 Insert cover clips into track. (One clip per foot)

2.23.2 Insert perpendicular to track, and turn **CLOCKWISE** to snap into place.

2.24   Cover spacers

Fig 24

2.24.1 Tip cover spacers into outer most edge of track.

2.24.2 Place one at each end of track as shown.

2.24.3 Tighten at 1 ft lbs (1Nm) or hand tighten.

<table>

2.25  Install brush profile

2.25.1  Measure and cut brush to appropriate length.  
2.25.2  Slide brush into cover.

2.26  Install view protection clips

2.26.1  Slide door open until it meets the end stop.  
2.26.2  Measure and cut view protection profile to fit into empty sliding portion of track - 3/16" [5].  
2.26.3  Snap view protection clips onto inside of cover as shown.  
2.26.4  Use minimum 1 clip per foot of profile.  
Exception: If profile is minimum of 1 foot in length, use 2 clips.
2.27  Install cover and view protection profile

2.27.1  Secure cover to clips and snap into place.

NOTE: Roll cover from the bottom upwards. Ensure the bottom of the cover is supported by the groove in the cover clip.

2.27.2  Tip view protection profile up into track and snap down into cover and onto track as shown.

2.28  Install end caps

2.28.1  Snap sidelite profile end caps into sidelite profile.

2.28.2  Snap end caps into cover.
