1 Technical specifications

1.1 Overview
These instructions are for installation of MUTO PREMIUM sliding door system XL120 for the following mounting and style versions:

1. Wall mount
1.1.1 General information
- dormakaba requires use of tempered monolithic or tempered laminated glass.
- dormakaba glass hardware is not suitable for application in rooms where chemicals (e.g. chlorine) are used as indoor swimming pools, saunas or salt-water pools.
- Never move sliding panels faster than walking speed and always stop the door manually before it reaches end position.
- Do not slide doors with excessive force. Install limiting stop to prevent door from opening too far.

1.1.2 Intended use
- For sliding door in dry indoor areas only
- For manual slowly opening and closing only

1.1.3 Glass requirements and fittings
- The substructure/wall must be able to bear permanent loads and be level (max. tolerance: 1/16" [2] per 39" [1m]).
- Fasteners must be sufficiently dimensioned for the substructure/wall and weight of the door.
- When adjusting glass components, always stick to the required clearance for the respective hardware. Adjust clearance so glass does not come in contact with any hard surfaces such as glass, metal or concrete.
- Do not use excessive force when installing the glass (avoid over tightening screws).

1.1.4 Requirements for glass panel
- dormakaba requires use of fully tempered glass, which complies with ASTM C 1036 and ASTM C 1048. Secondary heat soaking processes are recommended but not required. This applies to both tempered monolithic and tempered laminated glass.
- Clamping area must be flat and uncoated (no self-cleaning coating!)
- Never use glass with conchoidal fractures and/or damaged edges.

1.1.5 Safety instructions
- Installation requires two people.

1.1.6 Symbols used - Safety/Installation

CAUTION
Mounting components must meet the requirements of substructure/wall and door weight. Please read the technical information for fittings.

WARNING
Risk of breaking glass. When installing the door, support the door panel with a block of wood or similar object.

TIPS AND RECOMMENDATIONS
Information note

CLOSING EDGE

1.1.7 Maintenance, care, repair
- Immediately replace damaged parts.
- Always use original dormakaba parts.
- Clean clamping area with alcohol-based standard commercial cleaning agent before mounting the glass hardware.
- Use a damp clothe for occasional cleaning, especially the track.
- Always use silicone - and oil-free cleaners (e.g. acetone).
- Check glass hardware at regular intervals for proper positioning and smooth operation and correct adjustment.
- High traffic door systems require inspection by properly qualified staff (specialized companies or installation firms.)

1.1.8 Disposal
Disposal in accordance with local, state and national regulations.
1.2 Specifications - technical data

</tr>
<tr>
<td>Full cure time (normal door usage not recommended until full cure time as been met)</td>
<td>48 hours @ 73°F or more</td>
</tr>
</tbody>
</table>

NOTE: Door glass should not be installed until the full cure time as been reached (see chart above).

1.1 Clean clamping area with alcohol-based standard commercial cleaning agent before mounting the glass hardware.

Important safety-related information for the mounting and use of dormakaba glass hardware.

1.2 Never clamp metal glass fitting hardware directly to glass surface.
1.3 Never use clamping product on surfaces with self-cleaning coatings.

2 Scotch-Weld™ EPX™ Plus II Applicator with 1:1 Plunger is a trademark of 3M.
3 Scotch-Weld™ EPX™ Plus II Mixing Square Nozzle is a trademark of 3M.
2 Installation instructions

2.1 Overall
2.2 Securing track to mounting surface

2.2.1 Ensure the track is properly level and secure it to the ceiling per the appropriate measurements on the following page.

• NOTE: SEE DIMENSION INSTRUCTIONS ON NEXT PAGE FOR REFERENCE.

2.2.2 Use appropriate fasteners according to the following recommendations.

NOTE: WALL REINFORCEMENT:
The wall reinforcement must be a minimum of \( \frac{1}{4}'' \times 3'' \times 3'' \) steel angle, 16 gauge metal stud, or 1-1/2'' thick wood blocking secured to the wall studs on a maximum 16'' centers for the length of the track. The wall reinforcement may be flush on the wall surface or on the interior of the wall. For masonry walls the track may be secured directly to the wall with lead anchors.

Track mounting screws must fully penetrate the steel angle, metal stud, or wood blocking, utilizing the predrilled holes in the MUTO track.

Consult with a structural engineer to determine if reinforcement is adequate for your specific application or to meet specific codes in your location.
2.3 Door/wall dimensions

Single door mount

Double door mount

Technical specifications
2.4A Installing roller carriers:
on monolithic glass ONLY

Fig. 2

2.4A.1 Slide roller carriers onto glass.
2.4A.2 Slide glass gasket and metal shim between glass and roller carrier.

- NOTE: Orient gasket with rubber side facing the glass.
2.4A.3 Secure roller carriers to glass using appropriate-size hex key at 10 ft lbs [14 Nm].

NOTE: FULLY CLEAN SURFACE OF GLASS WITH AN ALCOHOL-BASED MILD GLASS AND SURFACE CLEANER. ENSURE NO DEBRIS IS ON THE GASKET.

NOTE: ENSURE ROLLER CARRIER WHEELS ARE FREE OF DEBRIS.
2.4B Installing roller carriers:
  on tempered laminate glass ONLY

Fig. 3

**NOTE:** THE RECOMMENDED ADHESIVE’S SET-UP TIME IS 20 MINUTES FOR THE DUO-PAK CARTRIDGES.
**NOTE:** USE 1:1 RATIO PLUNGER WITH THE 3M™ Scotch-Weld™ Urethane Adhesive.
**NOTE:** FULLY CLEAN SURFACE OF GLASS WITH AN ALCOHOL-BASED MILD GLASS AND SURFACE CLEANER. ENSURE NO DEBRIS IS ON THE GASKET.
**NOTE:** ENSURE ROLLER CARRIER WHEELS ARE FREE OF DEBRIS.

### 2.4B.1 Slide carriers onto glass.
### 2.4B.2 Replace existing gasket with TLG gasket.
### 2.4B.3 Slide laminated glass gasket and metal shim between glass and roller carrier.
**NOTE:** Orient gasket with rubber side facing the glass.
### 2.4B.4 Replace existing set screws with vented set screws.
### 2.4B.5 Tighten vented set screws at 4 ft lbs [5Nm].

### NOTE: Onto scrap material, first dispense approximately 12" of 3M™ Scotch-Weld™ Urethane Adhesive prior to application to prevent mixing errors and ensure optimal hardening.

![Diagram of roller carriers and gasket installation](image)

2.4B.6 Dispense adhesive into vented set screws on both sides of carrier.
**Stop application when adhesive can be seen past edge of roller carrier.**

**DO NOT WIPE** any excess adhesive from glass surface. Allow adhesive to dry and scrape off glass surface with a beveled-edge chisel or putty knife.
**NOTE:** Keep glass flat during curing process.
**NOTE:** See chart in Specifications section for appropriate curing time.
2.5 Installing DORMOTION

Fig. 4

2.5.1 Slide DORMOTION dampener onto glass.
- **NOTE:** Oriented with triggers facing outward.

2.5.1 Dampener must be flush against leading roller carrier.

- **NOTE:** Leading carrier is on side of glass closest to latch.

2.5.2 Secure dampener to glass using appropriate-size hex key.

2.5.3 Engage triggers: push out towards end of DORMOTION unit.

2.6 Disengaging the anti-jump

Fig. 5

2.6.1 Disengage the anti-jump on roller carrier.

- **NOTE:** Using the appropriate-size hex key, push anti-jump adjustment screw IN and turn COUNTER-CLOCKWISE 90° to disengage anti-jump.
2.7 Installing the end stops

Fig. 6

Handing the [opening side] end stop:
2.7.1 Determine closing edge of door.
2.7.2 Hand self-close end stop by inserting bumper on appropriate side of end stop.

Install both end stops:
2.7.3 Slide self-close end stop into opening side of track.
2.7.4 Slide appropriate standard end stop into closing side of track.

NOTE: Loosen bottom section of end stop for easier install.
NOTE: Be sure set screw is flush with back of bumper.
NOTE: Adjustment can be set in the "Adjustment End Stop Location" section.

2.8 Install glass/rollers in track

Fig. 7

*If installing/hanging tempered laminated glass panels, ensure carrier adhesive has cured for 48 hours. See Specifications for more information on cure time.*

*Ensure Rollers and Track are Free of Debris.*

2.8.1 Place glass on setting blocks on floor for stability.
2.8.2 Tip glass and rollers upward and rest rollers on track.
2.9 Install floor guide

Fig. 8

2.9.1 Align centerline of glass with centerline of floor guide.
2.9.2 Be sure the glass is plumb.
2.9.3 Mark appropriate floor guide measurements.

2.9.4 TEMPORARILY REMOVE GLASS AND ROLLERS FROM TRACK.
2.9.5 Pre-drill into mounting surface using a 5/16" drill bit.
2.9.6 Secure floor guide anchor with included fasteners.

2.10 Install floor guide: continued

Fig. 9

2.10.1 SET GLASS AND ROLLERS BACKONTO TRACK.
2.10.2 Slide floor guide over floor guide anchor and tighten with set screws.

2.10.3 Remove setting blocks.

NOTE: Be sure glass is centered in floor guide.
2.10.4 Adjust using set screws.
2.11 Engaging anti-jump

Fig. 10

2.11.1 Engage anti-jump on roller carrier.

2.11.2 Using appropriate-size hex key, push anti-jump adjustment screw IN and turn CLOCKWISE 90° to engage anti-jump.

2.12 Adjustment door height

Fig. 11

2.12.1 Set height of glass door.

2.12.2 Loosen height adjustment locking screws of carrier.

2.12.3 Using appropriate-size hex key, turn height adjustment screw CLOCKWISE or COUNTER-CLOCKWISE to raise or lower glass.

NOTE: Be sure glass is level during this adjustment.
2.13 Adjustment end stop location: LEADING end stop

Fig. 12

End stop
Bumper
Edge of roller carrier

Glass overlap on wall
max. 1-3/16" [30]

Door pull to jamb distance.
*Verify with local jurisdiction.*

NOTE: bi-folding: Be sure there is a 1/4" [6] gap between the right and left hand sets.

Set end stop locations:
2.13.1 Slide end stop to desired location on track. Bumper should touch edge of roller carrier.

Hex key size
XL120 3mm

End stop
Bumper

Door closed

XL12 torque

Edge of roller carrier

Door pull to jamb distance.
*Verify with local jurisdiction.*

NOTE: bi-folding: Be sure there is a 1/4" [6] gap between the right and left hand sets.

Set end stop locations:
2.13.1 Slide end stop to desired location on track. Bumper should touch edge of roller carrier.

Hex key size
XL120 3mm

End stop
Bumper

Door opened

XL12 torque
3 ft lbs [4 Nm]
2.14 Install DORMOTION start/stops

2.14.1 Loosen hex screws on plates. Plates should start out parallel to track.

2.14.2 Place start/stops into track channel.

2.14.3 Slide door all the way OPEN.

2.14.4 Carrier should touch end stop.

2.14.5 Slide start/stop into Dormotion unit trigger.

2.14.6 Rotate plates inside track to engage.

2.14.7 Hand tighten hex screws.

2.14.8 Adjust using center set screw, then fully tighten hex screws.
2.15 Install self-close hold open clamp

Fig. 15

2.15.1 Secure self-close hold open clamp to the end stop furthest from latch [closing side].

- Use two screws and tighten to 2.5 ft lbs (3Nm).

2.16 Install self-close hold open ball

Fig. 16

2.16.1 Secure self-close hold open ball to carrier furthest from latch [closing side].

- Use two screws and tighten at 2.5 ft lbs [3Nm].

2.17 Install self-close cable connector

Fig. 17

2.17.1 Secure self-close cable connector to opposite end of carrier, furthest from latch [closing side].

- Use two screws and tighten at 2.5 ft lbs (3Nm).
2.18 Install self-close cable unit

Fig. 18

2.18.1 Secure self-close cable unit into first groove of MUTO track.
2.18.2 Rotate plates inside track channel to engage.

- Use three screws/plates and tighten at 3 ft lbs (4 Nm).

2.19 Prepare self-close cable unit

Fig. 19

2.19.1 Pull "end of cable" over to connect with cable connector.
2.19.2 Continue to pull cable through connector to either increase or decrease self-closing tension.
2.20 Adjust tension in self-close cable unit

Fig. 20

2.20.1 To adjust tension in cable unit cord if necessary, pull 'beginning knot of cable' through cable holder.

2.20.2 Secure another 'knot' and pull cable through holder as show in image above.

2.20.3 Secure beginning 'knot' in holder clamp. NOTE: Be sure there is a 7-7/8" (200) gap between each new 'knot' in the cord.
2.21  Cover clips

Fig. 21

2.21.1  Insert cover clips into track. (One clip per foot)

2.21.2  Insert perpendicular to track, and turn **CLOCKWISE** to snap into place.

2.22  Install brush profile

Fig. 22

2.22.1  Measure and cut brush to appropriate length.

2.22.2  Slide brush into cover.
2.23 Install view protection clips

Fig. 23

TO BE USED WITH ONE OR MULTIPLE SIDELITE APPLICATIONS.

2.23.1 Slide door open until it meets the end stop.
2.23.2 Measure and cut view protection profile to fit into empty sliding portion of track - 3/16" [5].
2.23.3 Snap view protection clips onto inside of cover as shown.
2.23.4 Use minimum 1 clip per foot of profile. Exception: If profile is minimum of 1 foot in length, use 2 clips.
2.24  Install cover and view protection profile

2.24.1  Secure cover to clips and snap into place.  
**NOTE:** Roll cover from the bottom upwards. Ensure the bottom of the cover is supported by the groove in the cover clip.

2.24.2  Tip view protection profile up into track and snap down into cover and onto track as shown.

2.25  Install end caps

2.25.1  Snap end caps onto track.
