D900 MORTISE DEAD BOLT

Installation Instructions

**Overall Exploded View**

**Tools required for installation**
- #2 Phillips screwdriver

**D900 with standard thumb turn part list**
1. Thumb turn assembly
2. 6-32 x ⅜" machine screws
3. Cylinder ring
4. Wave washer
5. Mortise cylinder
6. 8-32 x ¼" flat head screws
7. Armor plate
8. 12-24 x 1" combo screws
9. Chassis
10. #6 x ⅜" wood screws

---

1. **Install lock body**
   1.1 Place the lock body into the door edge.
   1.2 Secure with two 12-24 x 1" combo screws.

---

2. **Assemble and install mortise cylinder.**
   **Conventional mortise cylinder**
   2.1A Slide the wave washer and cylinder ring over the cylinder.
   **NOTE:** Do not over torque the key as it could cause the key to bend or break.
   **NOTE:** Ensure the cylinder face is flush with the ring.
   **NOTE:** D962 Double Cylinder: do not tighten the cylinder retainer screws until both cylinders have been installed.
   2.2A Tighten the cylinder in place using the cylinder retainer screw. See FIGURE 1 in this step.

---

**IC mortise housing**
2.1B Insert the core into the mortise housing.
2.2B Slide the wave washer and outside cylinder ring over the housing.
**NOTE:** Do not over torque the key as it could cause the key to bend or break.
**NOTE:** Ensure the cylinder face is flush with the housing.
**NOTE:** D962 Double Cylinder: do not tighten the cylinder retaining screws until both cylinders have been installed.
2.3B Tighten the housing in place using the cylinder retainer screw.

---

**Plug** (At bottom center of cylinder when installed)

**Cylinder ring**

**Wave washer**

**Cylinder**

**Cylinder retainer screws**

**Cylinder retainer engaged**

**Cylinder retainer retracted**
