

Interior Glass Systems

Patch Fittings

MUNDUS

The new MUNDUS patch fitting joins dormakaba's already broad range of options and configurations. Uniquely designed for tempered glass doors, MUNDUS fittings are elegantly shaped with straight edges and rounded corners, made from high quality materials, and finished with precision.

The benefits are substantial:

- Clean design, with no visible fasteners.
- Wide range of finishes and materials.
- Fast installation, adjustable even when mounted.
- Equipped for the right glass thickness; adjusts to common glass thicknesses without changing gaskets.
- Suitable for tempered laminated glass (TLG).
- Easy to retrofit and integrate into existing systems.

The elegantly designed and precision-finished MUNDUS patch fitting.

Discrete and versatile patch fittings for tempered glass assemblies. Patch fittings are ideal for almost any frameless all glass design. dormakaba's range of patch fittings allows designers to create interior and exterior openings that are both technically sound and visually attractive.

MUNDUS – easy to install, easy to adjust

dormakaba's comprehensive line of patch fittings allows the transparent elegance of glass doors to reach their full potential—whether hung in frames or integrated into tempered glass openings.

MUNDUS offers multi-directional adjustability, even after installation.

Multi-directional adjustability makes the MUNDUS patch fitting a truly perfect fit. Installation is simple—attach the body directly to the glass, then snap on the individual cover. Once installed, the fitting can be adjusted at any time, offering pivot point and flush alignment, as well as zero position.

MUNDUS eliminates the need for gaskets to adjust the fittings for common glass thicknesses. Instead, two screws on the patch fitting body are used to determine the glass thickness, which can range from 5/16" (8) to 7/8" (22). By increasing weight capacity up to 440 lb and supporting tempered laminated glass (TLG), MUNDUS Premium fittings offer impressive benefits:

- A high level of user safety, even with large glass doors.
- Decreased noise levels enabled by integrating noise-reducing laminate.
- Glass doors as design elements utilizing decorative TLG.

MUNDUS finishes

MUNDUS patch fittings are available in a variety of finishes for matching with the building's architectural finishes or color scheme.

dormakaba finish	Old DORMA Glass finish	Description
628	101	Clear anodized
