

Kaba AP2pro

Protection against impressing is provided by a special profile, precision bores and specially formed tumbler pins.

Key security

Every AP2 PRO cylinder is supplied with a security card (KeyCard). The KeyCard contains the unique serial number of the keying and serves as legitimation for ordering additional keys and cylinders. Duplicate keys can only be ordered upon presentation of the KeyCard to Kaba or an authorised dealer.

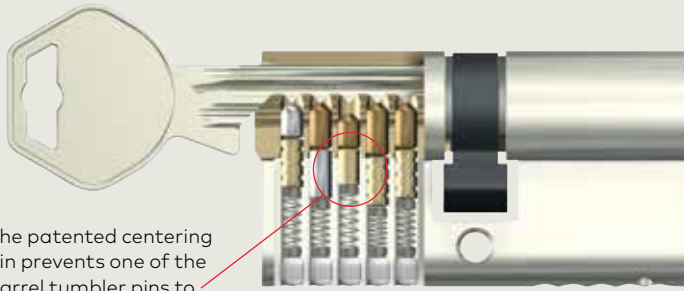

Standard version

- 5 keys (with Key Card)
- Key Card as proof of ownership
- Fastening screw M5 x 70 mm
- Security version with drilling protection
- Economy version without protection
- 5 spring loaded tumbler pin pairs
- Cam 9 mm wide
- Standard position for double cylinders 30°, for single cylinders 45° with 8 different settings

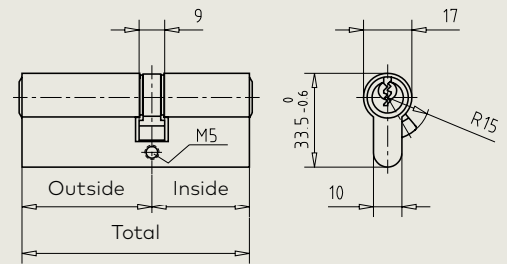

Advantages at a glance

- Profile legally protected
- Certified against the bumping method
- Overlapping key profile
- Available in the security version with drilling protection or in the economy version without drilling protection
- Fire protection T90 according to Austrian Standard ÖNORM
- Anti-picking and drilling protection
- Protection against impressing

Specification and dimensions

The patented centering pin prevents one of the barrel tumbler pins to come in contact with the bumping key.

Security double cylinder with 5 tumbler pins

AP 2000 is a proven, patented Serial cylinder system with 5 tumbler pins.

Additional protection against the „Bumping Method“

The "centering pin" developed by Kaba and registered for patent has been proven to prevent opening cylinders by the "bumping method". Even expert lock pickers have not succeeded to "bump open" a pextra cylinder (shown in Dutch television).

Drilling protection

by hardened tumbler pins and housing pins as well as by additional steel security elements in the barrel and housing to protect the tumbler pins and springs.

One key for all cylinders and doors
