

The branch groove is also a registered brand mark.

Kaba pextra+ Even more protection

In the Kaba pextra+ lock cylinder system, key security (key and cylinder are patented) is significantly increased by a key profile produced with a special milling procedure which, greatly hinders manipulation. Kaba pextra+ is the premium dormakaba lock cylinder system for serrated keys and is suitable for sophisticated master key systems with maximum security requirements.

Function

A specially designed keyway in the cylinder has tumbler pin pairs arranged both vertically and horizontally, and these must form a positive fit with the key to reach the shear plane required for opening. Burglary protection is significantly increased by the use of hardened elements and drilling protection pins. Horizontally arranged locking elements and an overlapping profile increase keying code protection significantly. The special centering pin prevents the cylinder from being opened by the bumping method (certified).

Profile and Active Pin

The new, improved and patented branch groove is manufactured on CNC controlled machine tools for highest accuracy. The branch groove cannot be copied on conventional key milling machines. The optional active probe (blocking) pin verifies the presence of the branch groove in the key. If the original branch groove is not milled on the key, the blocking pin prevents the key from being completely turned in the lock cylinder in both directions.

Flexibility

Kaba pextra+ is available in Europrofile as well as in Nordic, Union and Australian oval profiles. The pextra+ system can be used all types of mechanical locks enabling true master key systems for all enclosures and devices in a site.

Your advantages at a glance

- Double, single and thumbturn profile cylinders with 5, 6 and 7 pins.
- Full range of cylinder locks for furniture, key switches, elevator control, padlocks, camlocks and many more
- All cylinder types can be integrated into master key systems
- Profile families for flexible master key system capacity
- International certifications
- Patent protection until 2032
- Protection against the bumping method
- Key blanks are not available in commercial trade
- Replacement keys available only from Kaba or authorized dealers
- Dealer profiles are available for authorized partners
- Authorized dealers are trained to pin cylinders and produce replacement keys locally
- Personalized key coinage for authorized dealers
- Security card for proof of ownership for duplicate keys
- TrendKey and metal clip versions available
- Colored key clips for organization
- Transponder clip for Kaba digital and electronic access systems
- OEM cylinders available on request

More than mechanical security

The self changing or 1,2,3 system (SUZ) changes the keying in the cylinder by simply using the next key. Lost keys can be «locked out» without changing the lock cylinder. Kaba pextra+ has a unique, wide range of special function options that sets pextra+ in a class of its own.

The key override system (BSZ) is ideal for situations where access is required if a key is inserted in the cylinder on either side. Perfect for nursing homes or schools.

Increased pulling protection (LAM) with reinforcement of the cylinder housing by steel shims, meets the requirements of EN1303 Attack Resistance Grade 2. "LAM" Cylinders offer even more protection against burglary by tearing the cylinder out of the lock.

Beyond conventional mechanical security

Kaba pextra+ lock cylinders are available with some 20 additional special functions which provide additional security and convenience for a wide range of applications.

Special functions at a glance

- Additional picking protection
- Barrel pulling protection
- Cylinder blind on one side
- Key override from both sides
- Cam with relative movement
- Freewheel cam for gear operated and panic locks
- Emergency key override system
- Cylinder with occupied indicator
- Housing reinforced with steel shims against pulling for EN1303 attack resistance grade 2
- Personnel key
- Shear break-off against snapping

- Side locking elements
- Self changeable cylinder with one or two change keys
- Weather protection cap against filth and moisture
- Sea water resistant barrel
- Wear resistant barrel
- Cogwheel cams with 10 or 18 teeth

International Certifications Europe

- EN1303 Key Related Security Grade 4 for cylinders with 5 pins; Grade 6 for cylinders with 5 pins with the optional blocking pin and cylinders with 6 and 7 pins
- EN1303 Attack Resistance Grade 2 with appropriate door furniture or steel reinforcement shims
- DIN18252 grade 71 for 5 pins or grade 82 for 6 and 7 pin cylinders

Mechanical cylinders for all applications

Kaba cylinders are available in many profiles and lock types which are available and serial and master key system cylinders.

- Europrofile double, single and thumbturn cylinders
- Nordic oval profile cylinders
- Union oval profile cylinders
- Australian oval profile cylinders
- Rim cylinders for surface mounted door locks
- Screw-in cylinders
- Furniture and cabinet locks
- Camlocks
- Key switch cylinders
- Elevator control cylinders
- Padlocks
- Bible cylinders
- Portal double and single cylinders
- Window and door handles
- Key deposits and key storage
