Hidden convenience.

Designed for maximum transparency, MUTO Ceiling Mount Recessed (CE-R) is the newest addition to the MUTO family of manual sliding glass doors.

MUTO CE-R systems fit within a 3-3/4" (95) ID minimum width ceiling channel, while still providing the same features for enhancing ease of operation and convenience as non-recessed models. These optional features include:

• DORMOTION damping mechanism (DORMA SoftClose®)
• Door position status indicator
• Self-closing

Door adjustment remains hassle-free with customized tooling that integrates with the slim channel.

MUTO CE-R offers all the solutions available in non-recessed configurations: single- or double-door, with sidelites, self-closing, and synchro.

• Suitable for monolithic and tempered laminated glass, and wood doors.
• Supports door weights up to 330 lb (150 kg).

Note: Door width and height can vary; must not exceed weight limit
MUTO Recessed Mount CE-R systems provide the same features for enhancing ease of operation and convenience as non-recessed models.

### Specifications
