Kaba penta

cross Swiss

Precision for Even More Security

The Kaba penta cross key is extremely difficult to copy, even with the most modern copying technologies.

Only if the active element in the key agrees with the pins in the respective cylinder, can the expert cross key open and lock the matching cylinder.

Keys can only be ordered with legitimisation (the security card or a copy thereof) from dormakaba or from an authorised dealer.

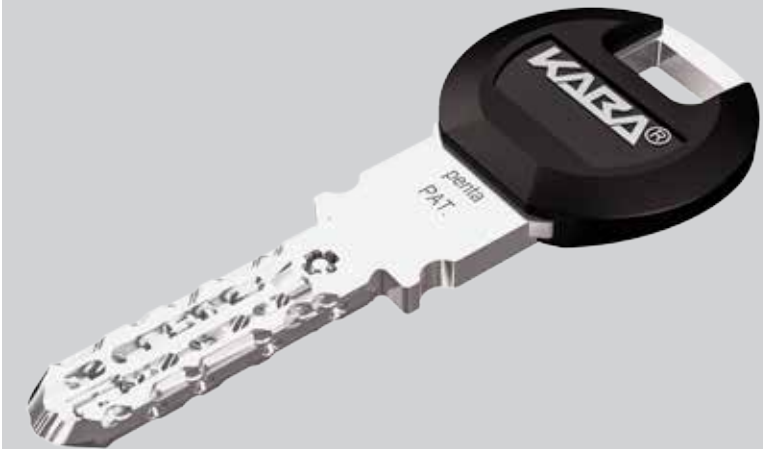

Your authorised dealer:

Certified Management System
ISO 9001:Reg.NO. Q1530367

Various technical properties of our keys are subject to legal patent protection.

Kaba penta cross provides even more security against illegal key copies.

dormakaba 

The movable security element in the key aligns with the security elements in the lock cylinder.

The advantages of Kaba systems at a glance

- European patent EP2890856 B1 valid until 2033
- PCT application, when granted valid until 2036?
- Increased security against illegal key copies for the owner / proprietor
- Additional elements on the key (cross) and in the lock cylinder make it more difficult to illegally copy keys
- The ergonomic reversible key can be inserted from either side
- No sharp corners or edges (no more torn clothes or bags)
- With key clips in 12 different colours, everyone is certain to find his or her favourite colour
- The clip colours can be used for organisation
- Easy to maintain - lubricate once a year with Kaba cleaner, available from authorised Kaba dealers
- Can be used for many types of locks (mortise door locks, rim locks, mailboxes, padlocks, key switches, furniture locks and many more)

Certifications

- EN1303 Key Related Security Grade 6 and Attack Resistance Grade D (with security door hardware or optional steel reinforcement in the housing)
- DIN 18242 Grade 82
- VdS B, VdS BZ (optional)
- FZG for gear operated locks and panic locks

Patent and brand protection

Various technical features of Kaba expert cross keys are subject to legal patent protection. They are quality brand products that have a high recognition value.

Security redefined

Kaba penta cross is perfectly suitable apartment buildings and any complex master key system. Key copies are only available from dormaaba or an authorised dealer against presentation of the security card supplied with the lock cylinder.
