2 dormakaba MUTO Premium Recessed Mount XL150 with Sidelites
Installation Instructions

936037

05-2018
1 Technical specifications

1.1 Overview

These instructions are for installation of MUTO PREMIUM sliding door system XL150 for the following mounting and style versions:

1. Recessed mounting

1.1.1 General information
- dormakaba requires use of tempered monolithic or tempered laminated glass.
- dormakaba glass hardware is not suitable for application in rooms where chemicals (e.g. chlorine) are used as indoor swimming pools, saunas or salt-water pools.
- Never move sliding panels faster than walking speed and always stop the door manually before it reaches end position.
- Do not slide doors with excessive force. Install limiting stop to prevent door from opening too far.

1.1.2 Intended use
- For sliding door in dry indoor areas only
- For manual slowly opening and closing only

1.1.3 Glass requirements and fittings
- The substructure/wall must be able to bear permanent loads and be level (max. tolerance: 1/16” [2] per 39” [1m]).
- Fasteners must be sufficiently dimensioned for the substructure/wall and weight of the door.
- When adjusting glass components, always stick to the required clearance for the respective hardware. Adjust clearance so glass does not come in contact with any hard surfaces such as glass, metal or concrete.
- Do not use excessive force when installing the glass (avoid over tightening screws).

1.1.4 Requirements for glass panel
- dormakaba requires use of fully tempered glass, which complies with ASTM C 1036 and ASTM C 1048. Secondary heat soaking processes are recommended but not required. This applies to both tempered monolithic and tempered laminated glass.
- Clamping area must be flat and uncoated (no self-cleaning coating!)
- Never use glass with conchoidal fractures and/or damaged edges.

1.1.5 Safety instructions
- Installation requires two people.
- Always wear protective clothing.

1.6 Symbols used - Safety/Installation

CAUTION
Mounting components must meet the requirements of substructure/wall and door weight. Please read the technical information for fittings.

WARNING
Risk of breaking glass. When installing the door, support the door panel with a block of wood or similar object.

TIPS AND RECOMMENDATIONS
Information note

CLOSED EDGE

1.7 Maintenance, care, repair
- Immediately replace damaged parts.
- Always use original dormakaba parts.
- Clean clamping area with alcohol-based standard commercial cleaning agent before mounting the glass hardware.
- Use a damp clothe for occasional cleaning, especially the track.
- Always use silicone - and oil-free cleaners (e.g. acetone).
- Check glass hardware at regular intervals for proper positioning and smooth operation and correct adjustment.
- High traffic door systems require inspection by properly qualified staff (specialized companies or installation firms.)

1.8 Disposal
Disposal in accordance with local, state and national regulations.
1.2 Specifications - technical data

</tr>
<tr>
<td></td>
<td>Full cure time (ormal door usage not recommended until full cure time has been met)</td>
<td>48 hours @ 73°F or more</td>
</tr>
</tbody>
</table>

NOTE: Door glass should not be installed until the full cure time as been reached (see chart above).

1.1 Clean clamping area with alcohol-based standard commercial cleaning agent before mounting the glass hardware.

1.2 Never clamp metal glass fitting hardware directly to glass surface.

1.3 Never use clamping product on surfaces with self-cleaning coatings.

2 Installation instructions

2.1 Overall

Fig. 1. Overall exploded view of entire system

1.1 Overall

1.1 Drop ceiling extrusion (optional)
1.2 Cover
1.3 Brush strip
1.4 Track
1.5 End Cap
1.6 Sidelite end cap
1.7 Sidelite section profile
1.8 Filler panel
1.9 Roller carriers
1.10 Recessed cover clips
1.11 End stop
1.12 Floor guide
1.13 U-channel
1.14 View protection clips
1.15 View protection profile
1.16 Sidelite glass gasket
1.17 U-channel gasket
1.18 U-channel end caps
2.2 Installing the end stops

Fig. 2 End stops

2.2.1 Slide end stops into each end of the track.  
**NOTE:** Loosen bottom section of end stop for easier install.

2.2.2 Set screw

2.3 Securing gasket to track

Fig. 3 Sidelite gasket

2.3.1 Ensure the track is cut to proper length.  
**NOTE:** SEE DIMENSION INSTRUCTIONS ON PAGE 9.

2.3.2 Cut adhesive gasket equal to sidelite glass width.

2.3.3 Adhere gasket along bottom edge of back of track.

2.4 Securing sidelite section profile to track

Fig. 4 Sidelite profile

2.4.1 Align sidelite profile holes with track profile holes.  
**NOTE:** Holes will be predrilled ever 7-7/8” [200].

2.4.2 Secure with 9/16” [14] fasteners provided.  
**NOTE:** Be sure fastener heads are flush with track to avoid rollers catching protruding fasteners.

**END STOPS**

**SIDELITE GASKET**

**SIDELITE PROFILE**
2.5 Secure track and sidelite extrusion into ceiling
(and drop ceiling extrusion, if supplied)

Fig. 5 Recessed mount applications

OPTION 1:
If recessed ON BOTH SIDES; DRYWALL VERTICALLY MOUNTED, reference the following images:

OPTION 2: If recessed ON BOTH SIDES; MAY BE DROP CEILING PROFILE OR REINFORCED DRYWALL, reference the following images:

2.5.1 Drill 1/4” pilot holes through remaining empty holes in track, through sidelite profile.

2.5.2 Secure drop ceiling extrusion to track and sidelite profile with 1-3/8” [35] fasteners provided.

See other Optional Applications at back of installation instructions.
2.6 Specifications for securing track to mounting surface

2.6.1 Ensure the track is properly level and secure it to the header mounting surface per the appropriate measurements on the following page.

NOTE: SEE DIMENSION INSTRUCTIONS ON NEXT PAGE FOR REFERENCE.

NOTE:
OVERHEAD REINFORCEMENT:
The overhead reinforcement must be a minimum of ¼” [6] x 3” [76] steel angle, 16 gauge metal stud, or two pieces of 1 1/2” [38] thick wood blocking (double stacked), secured to studs or joists on a maximum 16” [406] centers for the length of the track. The overhead reinforcement may be flush on the overhead surface or on the interior of this surface.

2.6.2 Use appropriate fasteners according to the following recommendations.

Track mounting screws must fully penetrate the steel angle, metal stud, or at a minimum of 2” [51] into wood blocking, utilizing the predrilled holes in the MUTO track.

Consult with a structural engineer to determine if reinforcement is adequate for your specific application or to meet specific codes in your location.
2.7 Door/wall dimensions

Single sidelite mount

![Diagram of single sidelite mount]

- (DW) Glass door panel
- (FPW) Sidelite glass
- 1-3/16" [30]
- Clear opening width (CW)

Multiple sidelite mount

![Diagram of multiple sidelite mount]

- (FPW) Sidelite glass
- (FWP) Glass door panel
- 1-3/16" [30]
- Clear opening width (CW)
2.8 Installing hook set

Fig. 6  Roller carriers

2.8.1 With rollers facing away from the installer, determine which roller will be leading and which will be trailing.

2.8.2 Secure hook onto roller with open side facing away from the installer.

2.8.3 Secure hook using appropriate-size hex key.

2.9 Installing U-channel for sidelite

Fig. 7  U-channel

2.9.1 Install gaskets as shown. Trim to correct length.

2.9.2 Secure u-channel to floor using appropriate fasteners.

NOTE: Ensure u-channel is plumb and the back of the u-channel profile aligns with back of sidelite profile.

NOTE: Gaskets are pre-installed.
2.10 Installing sidelite glass

Fig. 8 Sidelite glass

2.10.1 Place setting blocks into u-channel.
2.10.2 Spray inside of u-channel with glass cleaner.
2.10.3 Lift glass up and into sidelite profile.
2.10.4 Lower glass into u-channel.
2.10.5 Ensure there is 1/8" [3] gap between wall and edge of sidelite glass.
2.10.6 If using tempered laminated glass, gently press glass against u-channel gasket, and dispense silicone along full length of non-gasket side of u-channel.
2.11  Installing sidelite glass filler panel

Fig. 9  Sidelite filler panel

2.11.1  Fit filler panel between empty part of track and sidelite profile, on door side.

2.12  Installing sidelite glass gasket

Fig. 10  Sidelite gasket

2.12.1  Cut gasket to length.

2.12.2  Press gasket in between sidelite glass and sidelite profile.
2.13A Installing roller carriers: on monolithic glass ONLY

Fig. 11 Roller carriers

**NOTE:** FULLY CLEAN SURFACE OF GLASS WITH AN ALCOHOL-BASED MILD GLASS AND SURFACE CLEANER. ENSURE NO DEBRIS IS ON THE GASKET.

**NOTE:** ENSURE ROLLER CARRIERS ARE FREE OF DEBRIS.

2.13A.1 Slide roller carriers onto glass.
2.13A.2 Slide glass gasket and metal shim between glass and roller carrier.
2.13A.3 Secure roller carriers to glass at 10 ft lbs (14 Nm).

**NOTE:** Orient gasket with rubber side facing the glass.
2.13B Installing roller carriers: on tempered laminate glass ONLY

Fig. 12 Roller carriers

Determine the leading (X) versus trailing (Z) edge of the glass. “Leading is side closest to latch closed.”

Legend

- **Closing edge of door**

Torque values

- **XL150**
  - 4 ft lbs  
  - [5Nm]

Hex key size

- **XL150**
  - 4mm

---

**NOTE:** The recommended adhesive’s set-up time is 20 minutes for the Duo-Pak cartridges.

**NOTE:** Use 1:1 ratio plunger with the 3M™ Scotch-Weld™ Urethane Adhesive.

**NOTE:** Fully clean surface of glass with an alcohol-based mild glass and surface cleaner. Ensure no debris is on the gasket.

**NOTE:** Ensure roller carriers are free of debris.

---

2.13B.1 Slide carriers onto glass.
2.12B.2 Replace existing gasket with TLG gasket.
2.13B.3 Slide laminated glass gasket and metal shim between glass and roller carrier.

**NOTE:** Orient gasket with rubber side facing the glass.

2.12B.4 Relace existing set screws with vented set screws.
2.13B.5 Tighten vented set screws at 4 ft lbs (5Nm).

**NOTE:** Onto scrap material, first dispense approximately 12” of 3M™ Scotch-Weld™ Urethane Adhesive prior to application prevent mixing errors and ensure optimal hardening.

2.13B.6 Dispense into vented set screws on both sides of carrier.

**Stop application when adhesive can be seen past edge of roller carrier.**

**DO NOT WIPE** any excess adhesive from glass surface. Allow adhesive to dry and scrape off glass surface with a beveled-edge chisel or putty knife.

**NOTE:** Keep glass flat during curing process.

**NOTE:** See chart in Specifications section for appropriate curing time.
2.14 Disengaging the anti-jump

Fig. 13 Anti-jump

![Image of anti-jump mechanism]

**NOTE:** Anti-jump shipped engaged.

2.14.1 Disengage the anti-jump on roller carrier.

NOTE: Using optionals ratchet and provided bit, push anti-jump adjustment screw IN and turn COUNTER-CLOCKWISE 90° to **disengage** anti-jump.

2.15 Install glass/rollers in track

Fig. 14 Side view of door system

![Image of glass and rollers in track]

**WARNING:** ENSURE ROLLERS AND TRACK ARE FREE OF DEBRIS.

2.15.1 Place glass on setting blocks on floor for stability.
2.15.2 Lift glass and rollers up and rest rollers on track.

*If installing/hanging tempered laminated glass panels, ensure carrier adhesive has cured for 48 hours minimum. See Specifications section for more information regarding cure time.*
2.16 Install floor guide

Fig. 15 Floor guide

![Floor guide diagram](image)

**ANTI-JUMP IS DISENGAGED!**

2.16.1 Align centerline of glass with centerline of floor guide.
2.16.2 Be sure the glass is plumb.
2.16.3 Mark appropriate floor guide measurements.
2.16.4 TEMPORARILY REMOVE GLASS AND ROLLERS FROM TRACK.
2.16.5 Pre-drill into mounting surface using a 5/16” drill bit.
2.16.6 Secure floor guide anchor with included fasteners.

2.17 Install floor guide: continued

Fig. 16 Floor guide

![Floor guide diagram](image)

2.17.1 Set glass and rollers onto track.
2.17.2 Slide floor guide over floor guide anchor and tighten with set screws.
2.17.3 Remove setting blocks.

**NOTE:** Be sure glass is centered in floor guide.
2.17.4 Adjust using set screws.
2.18 Engaging anti-jump

Fig. 17 Anti-jump

2.18.1 Engage anti-jump on roller carrier.

NOTE: Using optional ratchet and provided bit, push anti-jump adjustment screw IN and turn CLOCKWISE 90° to engage anti-jump.

2.19 Adjustment door height

Fig. 18 Door adjustment

2.19.1 Set height of glass door.

2.19.2 Using the optional ratchet and provided bit, loosen height adjustment locking screws of carrier.

2.19.3 Using optional ratchet and provided bit, turn height adjustment screw CLOCKWISE or COUNTER-CLOCKWISE to raise or lower glass.

NOTE: Be sure glass is level during this adjustment.
2.20 Adjustment end stop
location: LEADING end stop

Fig. 19 End stops

**END STOP LOCATION: LEADING EDGE**

- **Bumper**
- **Edge of roller carrier**

**Door closed**

End stop

Door pull to jamb distance.

“Verify with local jurisdiction.”

**NOTE:** Pair of doors:
Be sure there is a 1/4” [6] gap between the two doors.

**Hex key size**

| XL150 | 3mm |

**XL150 torque**

3 ft lbs [4 Nm]
2.21 Secure drop ceiling extrusion to cover

Fig. 21 Drop ceiling extrusion

APPLICATION OPTION:
Drop ceiling on inside AND outside of door panel.

See Optional Applications section for more choices.

2.21.1 Pre-drill holes through cover groove into drop ceiling extrusion.

- **End holes**: approximately 2" [51] from end of cover
- **All other holes**: approximately 12" [305] apart
2.22  Install drop ceiling cover clips

Fig. 22 Drop ceiling extrusion cover clips

2.22.1 Slide cover clips on from end of cover.
2.22.2 Tighten with screw. **Be sure not to damage cover.**

**NOTE:** 1 clip per 2 feet of cover extrusion.

2.23  Install brush profile

Fig. 23 Brush profile for cover

2.23.1 Measure and cut brush to appropriate length.
2.23.2 Slide brush into cover.
2.24  Install view protection clips

Fig. 24  View protection clips

TO BE USED WITH ONE OR MULTIPLE SIDELITE APPLICATIONS.

2.24.1 Measure and cut view protection profile to fit into empty sliding portion of track - 3/16” [5].
2.24.2 Snap view protection clips onto inside of cover as shown.
2.24.3 Use minimum 1 clip per foot of profile. Exception: If profile is minimum of 1 foot [305] in length, use 2 clips.

2.25  Cover spacers

Fig. 25  Cover spacers

2.25.1 Tip cover spacers into outer most edge of track.
2.25.2 Place one at each end of track as shown.
2.25.3 Tighten at at 1 ft lbs [1Nm] or hand tighten.
2.26  Install cover and view protection profile

Fig. 26  Cover and profile

![Diagram of cover and view protection profile]

2.26.1  Install cover:
- Insert back prong lip of recessed cover clip into groove first.
- Rotate cover assembly up and then snap front prong lip of clip into track groove.

2.26.2  Once cover is in place, tip view protection profile up in between track and cover.

2.26.3  Snap down into cover and onto track as shown.

Note: If necessary, engage clip to track with flat screw driver (minimum 3/16" wide blade) until snapped into place.

2.27  Install end caps

Fig. 27  End caps

2.27.1  Snap end caps onto end of track.
3 Optional applications

Fig. 28 Drop ceiling applications

Option 3 - Recessed both sides; drop ceiling profile one side/flush vertical drywall other side.

Option 4 - Recessed one side only; drop ceiling profile one side/vertical drywall above.

Option 5 - Recessed both sides; drop ceiling profile one side/reinforced drywall other side.

Option 6 - Recessed one side only; drop ceiling profile cover side/reinforced drywall above side lite profile

Option 7 - Recessed one side only; drop ceiling profile one side/reinforced drywall above cover.

NOTE: Required blocked for proper securing of drywall not shown.
