

dormakaba b-comm for Workday Enterprise Time Collection with Certified Integration to Workday

b-comm for Workday

The dormakaba b-comm solution is trusted by more than 1,800 customers to safely capture and deliver employee time and labor entries to their ERP systems. Its enterprise-class design facilitates data collection from a variety of devices such as dormakaba Time Clocks, Smart Devices and PC/ Web Clocks.

Integrate

All integration is handled securely and seamlessly using standard Workday web services. Validation data is maintained in the Workday HCM, eliminating the need for redundant data entry. Time and Labor data collected in b-comm automatically updates the employee's Workday Time Sheet.

Validate

The innovative data collection solutions from dormakaba are designed to be highly available and provide real time validation. This validation significantly reduces, if not eliminates the efforts associated with time card corrections. Data collection solutions must be available 24 x 7. This high availability design ensures employees can use the b-comm system even during times of planned or unplanned outages.

Communicate

The ability to facilitate business communication is the founding principle of b-comm. The solution provides more than just a cost-effective way to manage time and labor data collection, it provides the best path to communicate with employees.

 - Time Off Requests

Why you should choose dormakaba as your Workday solution partner

Advice

Qualified application consultants work with you and your Workday consultant to develop your individual solution. In addition, there is a highly-motivated team specializing in Workday interfaces, communication and the technology of dormakaba terminals at your disposal.

International

We work internationally. This sets us apart from the others. There are over 1800 dormakaba installations in the ERP data collection market spread all around the world. In more than 60 countries around the globe satisfied customers are using dormakaba. Our branches on location and our partner companies ensure comprehensive customer service.

Software

The b-comm solution is constantly advancing with new Workday releases and is therefore kept up to date. In addition to this, with a variety of useful modules, we offer you a modular system of highly flexible software solutions to supplement and optimize your application.

Hardware

Thanks to new technologies, we have integrated the terminal functions and data processing into one innovative overall system. The applications of our new terminals communicate with websites and databases. This means that you can be flexible in terms of the type of your installation (on premises or hosted).

Protection of investment

With the development of new dormakaba terminals, the compatibility of one terminal series with the next terminal family always has top priority. This way, we ensure that you can use a mixture of your existing and new dormakaba terminals together, thereby protecting your investment for many years to come.

Quality

We develop and produce all components in an ISO 9001 approved quality management system. With modern development methods and procedures, our employees have dedicated themselves to meet your quality requirements without compromise.

What you get from us

dormakaba has a proven reputation developing solutions for the top ERP providers. We value the opportunity to partner with Workday.

Our dedication to providing top quality products has stood the test of time for more than 150 years.

The b-comm solution, paired with reliable time collection options, meets the needs of today's most demanding businesses.
