The smart access solution

Even small enterprises like petrol stations, start-ups or retailers and tradesmen need efficient access solutions. evolo smart is the right solution.

Newly recruited employees, temporary staff, people leaving the company or lost keys: it soon becomes complex to keep everything in view and consistently ensure that your business is secure. You need a modern electronic access solution to easily manage doors. evolo smart is particularly suitable for small enterprises. What is so special about our solution: you do not require any extra hardware to program the locking components, change access rights or cancel access authorisations – because you can now do it quickly and simply with your smartphone.

The small solution – simple and secure

Take advantage of dormakaba's proven evolvo system components to secure your doors. Depending on your needs, there are different versions and access media to provide you with the optimum solution.

The evolvo components are standalone components. This means that you don't need any additional wiring on your doors. If you are using conventional mechanical cylinders

you can switch to evolvo smart with minimum installation effort: you simply replace the mechanical cylinders with electronic versions. This also affords you maximum protection for your investment because the electronic components can be easily incorporated into larger-scale dormakaba access solutions. Your dormakaba specialist will be happy to advise you on which components are right for you.

01

02

03

04

01

Digital cylinder

It comes in various versions and simply replaces an existing mechanical cylinder. Its innovative design is impressive.

02

c-lever pro

It is suitable for inside and outside doors and is rated in a higher security class. The solution is user-friendly and suitable for most doors.

03

c-lever compact

Easy to retrofit, regardless of the lock or door furniture. This convenient solution is ideal for glass doors and impresses with its modern design.

04

Reader

Inside or outside: the reader is the right choice for automatic doors. Choose between different versions with a flush or remote reading unit.

It's as simple as this:

Manage doors easier in the future – all you need is a smartphone

The evolo smart Android app controls which persons have access to your doors. Simply tap the time profile if selected persons are to have limited access only. Door status information is also displayed directly on your smartphone. Use the app to enter new access media, cancel lost media and update door components using *NFC. And, best of all: you don't need an Internet connection for any of these processes.

* NFC: Near Field Communication

Application and benefits

- Perfect for small businesses with one or two doors
- Fast programming for new employees
- Easy deletion of lost media
- Easy time-based limitation of access
- Secure media thanks to advanced technology
- Direct scanning of access media per 2D code
- Security controlled over a separate programming card
- Easy migration into larger-scale systems

Simple configuration via smartphone
