

e-DATA QUICK SETUP: TIME1500

Step 1 MOUNT

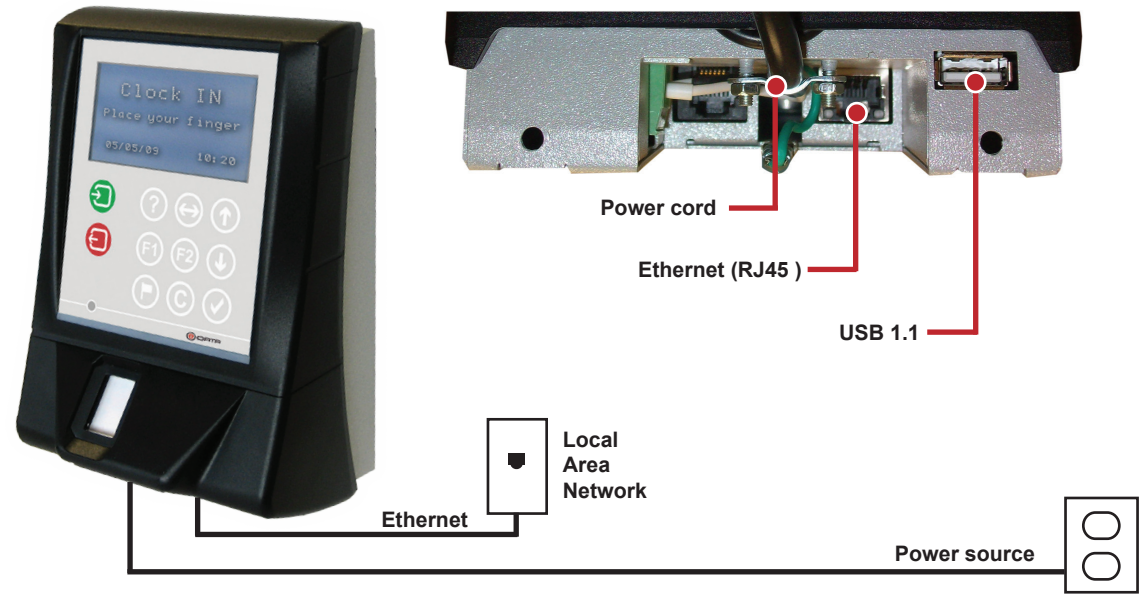

Step 2 POWER ON

- A** Connect Ethernet cable from corresponding port on bottom of terminal to Local Area Network (wall jack, network hub or router)
- B** Connect terminal to power supply
- C** Await IP address displayed on screen (example: 192.168.1.8)

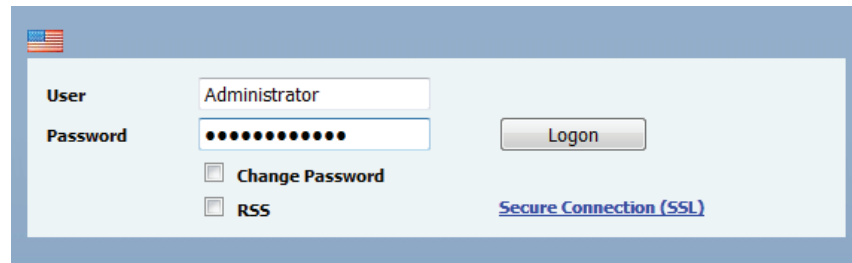

Step 3 NETWORK

- A** Default IP address
At startup, the terminal automatically pulls an IP address (via DHCP); you must record the IP address displayed on screen for later access
- B** Setting a fixed IP address (optional)
Refer to Time1500 manual for step-by-step details

Step 4 LOG IN AND CONFIGURE

- A** Connecting to Time1500
Open the browser of the network-connected PC
Enter the IP address into the browser address bar
The Login screen is displayed

- B** Log in to the system
Enter the name "Administrator"
Enter the password "changeconfig"
Click Logon
- C** Modify system for your specific needs (refer to manual)
