Keyscan web client interface allows you to manage access control from any web-enabled computer or mobile device.

This System VII access control management software add-on module provides you the ability to manage your access control systems for any of your facilities – at anytime and from any location.

K-Web is the ideal solution for those who need, or want, true mobility. It allows you to manage core functionality of your Keyscan System VII software from any internet connection using an internet browser. Use Keyscan’s K-WEB module, to make quick changes on the fly, without compromising the security of your facility.

Provided login and password authentication

Cardholder management
Including card additions, card archiving /deleting, access privileges adjustments.

Report Generation
Create and generate custom reports. Full System VII reporting options are available.

System Status & Alarm Review
