

Keyscan Aurora Access Control Software

New version 1.0.19 is available, offering more features, more options, more integration.

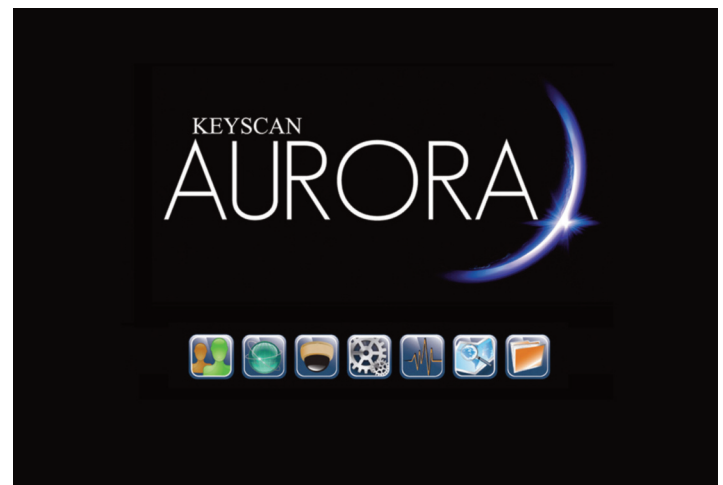

Keyscan Aurora access control management software continues to be an innovative high-performance software platform loaded with features and robust integration options. It provides a single software solution that powers Keyscan access control systems, regardless of size or complexity.

Keyscan Aurora Version 1.0.19 is now available and offers new key features including:

- New Enhanced Lockdown function
- Additional support features for E-Plex locks including E-7900 RFID wireless locks
- Added new video integration with OpenEye VMS Web Services (OWS)
- Additional supporting features for BEST G and V series standalone locks

You'll find these among more than 100 new features, enhancements and value-add options across all platforms including Aurora software, Aurora Software Development Kit (SDK), Aurora migration tool, E-Plex communications and Aurora web client.

To ensure your Keyscan access control system performs at peak efficiency, all Aurora users are encouraged to update your software regularly.
