

Keyscan Aurora

Access Control Software

New version 1.0.22 is available, with more features and enhanced capabilities.

Keyscan Aurora Version 1.0.22 is now available and offers new key features and integrations:

- **E-Plex Lock Offline Support**
Keyscan Aurora can now be used to program and manage E-Plex offline electronic locks. Program each lock with the same data from Aurora software. The data is uploaded to each lock using a handheld M-Unit.
- **7-Digit PIN Support**
Many users prefer to have PINs containing more than 4 digits. Keyscan Aurora now supports up to 7 digits allowing users to select more secure PIN codes.
- **Keyscan "SMART" Mobile Support**
Keyscan Aurora software offers full support for its new line of SMART mobile credentials.

Other Aurora Ver 1.0.21 enhancements include:

- Enhancements of the new Aurora SDK and API for simple and easy custom integration.
- New updates and improvements for Aurora Client.

- New updates and improvements to Aurora Web Client, as well as Aurora Communications, and Aurora Agent.

A total of more than 80 new enhancements and improvements have been made.

For a full list of new additions, enhancements and changes in Aurora V 1.0.22, [click here](#).

All Aurora users are encouraged to update your software regularly.
