

Keyscan Aurora

Access Control Software

New version 1.0.23 is available, with more features and enhanced capabilities.

Keyscan Aurora Version 1.0.23 is now available and offers new key features:

Windows Support

Keyscan Aurora added support for Windows 11 Professional and Enterprise 64 bit and Windows Server 2022 Standard 64 bit.

E-Plex Improvements

- Using status widgets, E-Plex users can now select individual locks for updates or synchronization rather than update all at once.
- E-Plex users can now reassign E-Plex locks to different door groups giving users more flexibility.
- Users can save more time by performing a time sync using the gateway status widget rather than switching to and from settings windows.

Other Aurora Ver 1.0.23 enhancements include:

- New updates and improvements to Aurora Client; Aurora Web Client, Aurora Communications.
- More than 50 new updates and enhancements to Aurora SDK and Aurora API.

Improved reporting

- E-Plex gateway programming can now be performed through Aurora client instead of E-Plex Services.

- Version 1.0.23 now adds additional information to gateway & zigbee information reports such as the lock's device ID.
- Users can now see battery status within reports as well as 'at-a-glance' on status widget.

A total of more than 150 new enhancements and improvements have been made. All Aurora users are encouraged to update your software regularly.
