PRIVÉ®

Enhanced privacy glass wall with sliding door

dormakaba Interior Glass Wall Systems bring the benefits of glass to the workplace—transparency, daylighting, versatility, efficiency, space saving, and low cost of ownership. These glass wall systems come in a range of sleek but rugged minimalist designs and configurations, allowing you to select a system that matches your project's functional and aesthetic requirements.

Design

PRIVÉ® Framed Glass Wall Systems provide the transparency of glass combined with features that enhance privacy and security. With an innovative blend of metal and glass, the PRIVÉ design fully frames the glass panels—adding rigidity and greater sound protection without interrupting sight lines. Framing eliminates gaps between panels and between panels and the surrounding structure.

Applications

PRIVÉ Framed Glass Walls are ideal for:

- Spaces requiring greater sound control
- Sliding door applications
- Office fronts
- Small conference rooms

Sliding door control options include:

- Traditional sliding
- SoftClose sliding

The SoftClose option provides a sophisticated touch by controlling and regulating closing speed—preventing the door from slamming or traveling too quickly.
