

Mobile access.
Access goes mobile

Access via smartphone

Flexible, fast, secure

Stay on the safe side with mobile access: send employees, guests or service providers access rights to their smartphones easily and flexibly. This lets you simplify your processes, because you no longer need to issue and collect access media.

How does mobile access work?

- It turns smartphones into the access medium
- It can be combined with dormakaba online and stand-alone components
- Manage all access rights centrally in your dormakaba access solution
- Send access rights via the Internet – with 100% security, of course
- Transfer door status and access event data to your dormakaba access solution

Your benefits

- User-friendly
- Deployment-friendly
- Manage it like conventional access media
- Optimise processes – assign access rights without on-premise staff:
- Save time and manpower
- Even isolated doors stay secure
- Easily cancel access rights if the smartphone is lost
- Additional security in case of smartphone loss (access only possible via PIN code)

Mobile access by dormakaba opens all doors to your employees and visitors – but only at your command.

Real life solutions

Applications with mobile access

Mobile access simplifies your access rights processes, because it is tailored to meet your daily needs. After all, you don't always have someone available to hand out access media personally. Our use cases show how mobile access simplifies complicated processes.

Access for your employees

Mobile access lets your employees access their workplace via their smartphone. Thanks to mobile access you can also **easily transfer access rights on**

the move. An employee visiting from New York, for instance is sent all the access rights to their smartphone while still in transit.

01

Access management goes flexible: change access rights as you like.

02

Mobile access offers speedy solutions when speed is what you need.

03

Securely send access rights to smartphones anywhere.

After business hours

Thanks to mobile access you are ready for visits after your regular business hours. No matter whether deliveries, cleaning firms or seminars on your premises:

assign access rights easily in advance. The access rights are then easily transferred to the smartphone, turning it into the access medium.

Assigning rights at short notice

If employees fall ill unexpectedly or stand-ins cover for them, you can react flexibly in these cases thanks to mobile access. **Transfer all the necessary access rights at**

short notice in real time. They can be sent instantly to the smartphone of the relevant person and adapted to suit at a moment's notice.

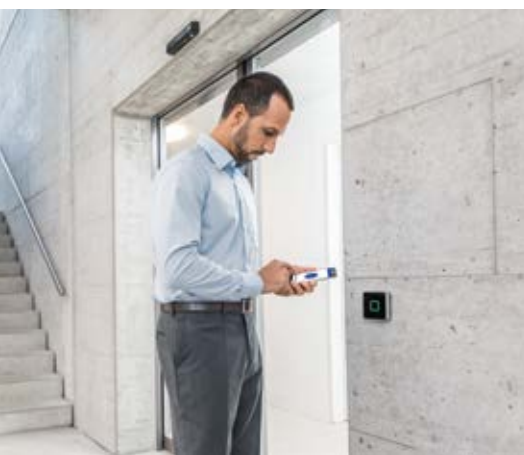

Night-time maintenance

If night-time maintenance is pending for your server room, you can **assign access rights for the exact time period in advance.** Mobile access lets you fix exactly

when and for how long a firm has access to your premises. Furthermore, you can very easily change, lengthen or shorten the time period.
