

## Cylinders passed to EN 1670 passed to Grade 5, 480 hours

dormakaba are pleased to announce that the following cylinder ranges have all passed corrosion testing grade 5 (480 hours), the highest grade achievable in EN 1670 'Building Hardware - Corrosion Resistance.'

Additionally, all of the below mentioned cylinders were required to stand up to the requirements of their previously accredited level of EN 1303 following the 480 hour salt spray corrosion testing.

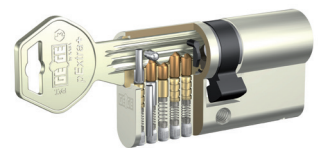

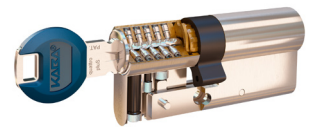

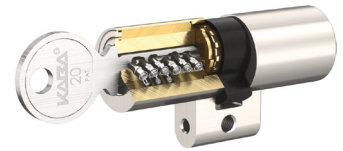

- Kaba 20
- quattro plus
- expert
- pextra Guard

By having our cylinders tested and passed to EN 1670, Grade 5, this gives our customers further confidence and trust in our cylinders, especially in harsh environments such as the Utility and Marine industries.
